

Breakwave Advisors' Kartsonas Presenting Risk Management Benefits of BDRY at Baltic Exchange Risk Forum in Greece

NEW YORK, May 29, 2018 — Breakwave Advisors announced today that John Kartsonas will be a featured speaker at the 2018 Baltic Exchange Risk forum hosted by the Baltic Exchange in Piraeus, Greece on Monday, June 4. Kartsonas is the Founder and Managing Partner of Breakwave Advisors LLC, a Commodity Trading Advisor based in New York City specializing in Shipping and Freight investments. Kartsonas's comments will be focused on the potential risk management benefits of the recently launched BDRY ETF.

Breakwave Advisors, in partnership with ETF Managers Group (ETFMG), launched the Breakwave Dry Bulk Shipping ETF (NYSE Arca: [BDRY](#)) on March 22, 2018. The Fund is the first and only freight futures exchange-traded product focusing exclusively on dry bulk shipping. BDRY provides investors direct access to an instrumental part of the global commodity market, that historically has been uncorrelated with other major asset classes.

For more information on the first ETF to provide long exposure to the dry bulk shipping market, BDRY, please visit www.drybulketf.com.

Investing in freight futures can be volatile and is not suitable for all investors.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This material must be accompanied or preceded by a prospectus. Please read the prospectus carefully before investing.

The Fund is not a registered investment company so shareholders do not have the protections of the Investment Company Act of 1940.

An investment in the Fund involves significant risks. You could lose all or part of your investment in the Fund, and the Fund's performance could trail that of other investments.

The value of the Shares of the Fund relates directly to the value of, and realized profit or loss from, the Freight Futures and other assets held by the Fund, and fluctuations in price could materially affect the Fund's shares. Investments in freight futures typically fluctuate in value with changes in spot charter

rates. Charter rates for dry bulk vessels are volatile and have declined significantly since their historic highs and may remain at low levels or decrease further in the future.

The Fund will not take defensive positions to protect against declining freight rates, which could cause a decline to the value of the Fund's shares.

Although the Fund's shares are listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the shares will be maintained. If an investor needs to sell shares at a time when no active trading market for them exists, the price the investor receives upon sale of the shares, assuming they were able to be sold, likely would be lower than if an active market existed.

The Fund is distributed by ETFMG Financial LLC, which is not affiliated with Breakwave Advisors.
